with Clock & Temperature Display

Model:
GH1023

Instruction Manual

INSTRUCTIONS:

Time Adjustment Setting:

Press and hold the time adjustment button for 3 seconds. The minute hand will begin to flash. Press the button again to start changing the time. Press and hold the button to adjust the time faster. After the time has been adjusted correctly, release the time adjustment button and wait up to 3 seconds for the time to take effect.

Note: It takes up to 3 seconds for the time to be adjusted, the time will not take effect if the unit is powered off between this time.

Power/LED Instructions:

- Switch to the left (facing clock), LED clock and temperature appears.
- Switch to the right (facing clock), only the fan will turn on with no LED display.
- Switch to the middle, turns off both fan and LEDs .
