Mode / Power Button

45° Adjustable Head
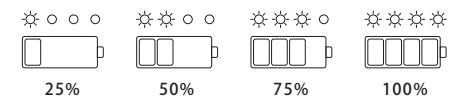

USB Micro B Power Socket

Operation:

1. It is recommended to charge the unit before use; plug in the USB micro B cable provided to the power socket of the desktop fan.

2. Plug the opposite end of the USB cable to a USB charging source such as a computer or USB mains adaptor.

3. Press the mode/power button once to turn the unit on low speed, 2 times for medium speed, 3 times for high speed and 4 times for wind mode. Wind mode will cycle between low and high fan speeds to emulate the wind.

4. Press the mode/power button 5 times from when you turn it on for the fan to turn off. There will no LED's lit when the fan is turned off.

Note: When cleaning the fan, you can take off the front fan cover by rotating it counter clockwise and then clockwise when attaching it back on.
