Part details

● Transmitter

● Mini racer

Preparation

1. Open the can, detach the can cover and can body. Push the LOCK inside the can cover towards the direction shown to release the 4 road-block.

2. Take out the transmitter and car from the can body. Slide the car by the direction shown in the picture, take it out.

3. Use a Phillips screwdriver to loosen the screw counterclockwise and open the battery cover on the back of the remote control in the direction of the arrow.

4. Insert 2 x AA batteries with the correct polarity, then replace the battery cover, tighten the screws.

Operation

1. After installing the battery on the remote control, turn on the switch and the frequency light flashes. After the car turned on, the remote control frequency light will go out, indicating that the frequency matched successfully. If the light flashes, it means the frequency matched unsuccessfully.

2. Function of transmitter button:
(1). After the remote control button is pressed, the frequency light will light up and the car will act accordingly.
(2). When the forward/backward button pressed, the engineering vehicle can move forward/backward.
(3). When you press the forward/backward button and press the left/right turn button at the same time, the engineering vehicle can turn forward/backward and turn left/right.

3. Adjust the trimmer at the front of bottom of the engineering vehicle to adjust the straight-line driving performance of the engineering vehicle.

1. Open the charger cover as illustrated and take out the CHARGING PLUG.

2. Insert the CHARGING PLUG to the CHARGING JACK on the bottom of the mini racer, the CHARGING INDICATOR lights up indicate the charging is in process. Make sure the power switch of the car is turned off. It is normal for the frequency lamp to flash when charging. When charging, the charging head should be recognized the direction, and remember to turn off the switch when not in use.

3. The mini racer is fully charged when the CHARGING INDICATOR goes off. Charging time: 3-4 minutes.
