Introduction of the Operating Rod

1. Accelerator operating rod(the direction operating rod controls the driving route and direction)

2. Direction operating rod(the accelerator operating rod controls the forward, backward, turning left and turning right)

MATTERS NEED ATTENTION IN DRIVING

- When the car moves, please don't touch the four wheels of the remote control vehicle, so as to avoid twist wound or incised wound.
- When the remote control or vehicle has low power, the remote control distance will be affected. In the meanwhile, there will be too low speed or climbing difficulty.
- The remote control vehicle can not fall from altitude or have serious collision, because it might damage the remote controller or shorten the service life of the vehicle.
- Please do not play the vehicle near the roadside, puddle, earth or other dangerous places, so as to avoid danger.

BATTERY INSTALLATION OF THE VEHICLE

(1) Revolve the screwdriver to open the battery lid;

(2) Install the battery in right polarity;

(3) Cover the battery lid and tighten the bolt.

CHARGE THE BATTERY OF THE VEHICLE

Please firstly take the battery out of the vehicle, and then insert the power plug into the USB charging socket, and then insert the other end of the USB charging line into the charging adapter or computer USB terminal for charging. In charging, the red light on the USB wire is normally on. When it is fully charged, the green light on the USB wire is normally on.

3

CHANGE DRIFT TIRE

- 1-Use the screwdriver to remove the tire to replace the drift tires.
- 2-When replacing the tire, do not lose the small iron axle, the small iron piece and the hexagonal sleeve, otherwise the tire will not rotate properly.

- 3-Please scan the QR code to view the replacement tutorial.
