# Solderless Breadboard with Power and I/O Breakout Board

This kit comprises of a solderless breadboard with 830 connection tie-points, a power supply module and 64 pieces of mixed Jumper cables. Solderless breadboards are great for building and testing new circuits. Ideal for circuit board prototyping and Arduino® projects. The power module can be plugged into the power rails and can be powered from either a 12V plug pack or from 5V using the USB socket and has a switchable output between 3V and 5V DC.
