

1 Important Safety Instructions

Read all instructions carefully before use. Keep these instructions for future reference.

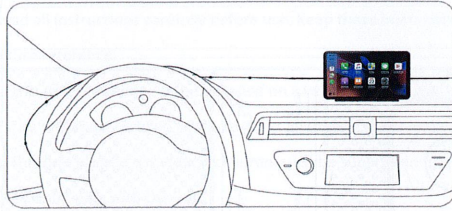

1. This unit is intended to be installed on a vehicle dashboard.
2. The unit must be used under cover at all times. Do not immerse.
3. This unit is not a toy. Young children must be supervised to ensure they don't play with the unit.
4. Note on vehicle battery drain: This unit can be set to record loop videos to a connected microSD card whenever the unit has power. On some cars, the DC port supplies power even when the engine is off. This may lead to vehicle battery draining. In such cases, unplug the unit from the DC port when the engine is off.

2 Product Overview

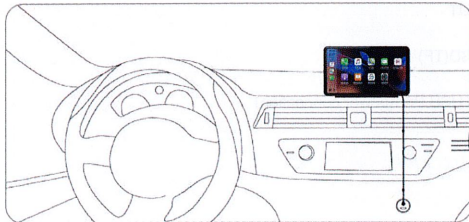

1. Power Button
2. AUX OUT
3. Micro SD(TF) card slot
4. Type-C USB Port(power connection)

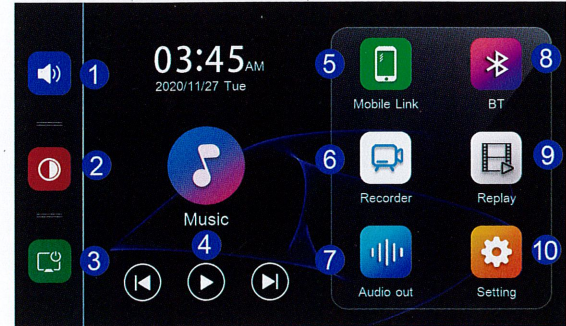

Installation

1. Align the notches on the mount and the rear of the unit, then push the unit down until it clicks. Make sure the unit is securely attached.
2. Adjust the angle as required using the screw on the mount.
3. Choose a suitable location on the dashboard of your vehicle making sure the cable can reach the DC 12-24V port on your vehicle. Clean the area with a cleaning wipe so that it will stick properly.
4. Use the adhesive sticker to stick the mount to the chosen surface.
5. Connect the Type-C end of the included Car Adaptor to the Type-C Port on the unit; connect the Car Adaptor to the DC 12-24V port on your vehicle.
