- 1 x IR Remote
- 1 x Mounting Stand
- 1 x Mounting Spike
- 1 x Power Supply
- 1 x User Manual

SAFETY INSTRUCTIONS

- To protect the environment, please try to recycle the packaging material as much as possible.
- Don't throw this product away as general trash, please deal with the product in accordance with electronic product regulation in your country.
- Do not install near flammable objects.
- Do not use it when maximum ambient temperature is higher than 40°C.
- Unplug the unit when it is not used for a long period of time or before replacing the bulb.
- Please use the original packing when the device is being transported.

WARNING! KEEP BUTTON BATTERIES OUT OF REACH OF CHILDREN

- If swallowed a lithium button battery may lead to serious or fatal injury in as little as 2 hours, due to chemical burns and potential perforation of the oesophagus.
- Non-lithium button batteries battery can cause serious injuries if it is swallowed or placed inside any part of the body.
- All button batteries must be kept away from children regardless if they are new or used.
- If you suspect your child has swallowed or inserted a button battery immediately call the 24-hour Poisons Information Centre on 13 11 26 (Australia) or 0800 764 766 (New Zealand) for fast, expert advice.
- If your child is having difficulty breathing contact 000 (Australia) or 111 (New Zealand).
- Dispose of used button batteries immediately and safely out of the reach of children. A battery can still be dangerous even when it can no longer operate the device.
- As soon as you have finished using a button battery, put sticky tape around both sides of it. This will make it harder for children to swallow the button battery and avoid the risk of the battery catching fire.
- Immediately dispose of button batteries immediately out of reach of children, or recycle using a child resistant container and take used cells to your local battery collection centre.

LASER SAFETY WARNINGS

A Class IIIa Laser is safe because of the blink reflex if not viewed through optical instruments. As with Class 1, this applies to laser beams with a large diameter or large divergence, for which the amount of light passing through the pupil cannot exceed the limits for Class IIIa.

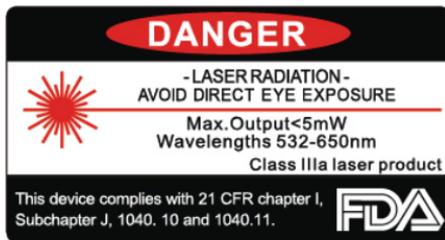

Warning!

Under no circumstance should you attempt to open the protective housing or operate the device if the aperture windows are damaged.

Caution!

The Laser security measures are designed according to the specific terms of the relevant international laser safety standards and has the following laser safety protection means.

Laser Safety Labels: The labels in accordance with European/FDA standard are stuck to the device body.

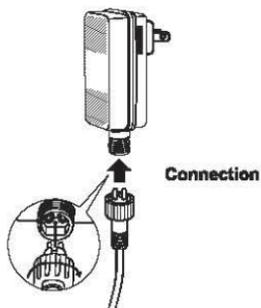

PRODUCT INSTRUCTIONS

Attention!

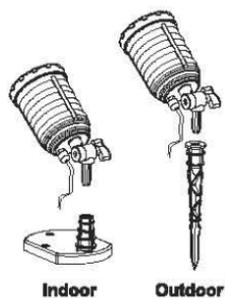

All servicing to this laser display device require the protective housing to be opened and/or removed and so must be performed by a qualified technician. Opening the protective housing voids the warranty.
