

## Rechargeable LED PAR Light User Manual SL-3515

### Box Contents:

- 1 x Rechargeable LED PAR Light
- 1 x Infrared Remote Control
- 1 x USB to DC Charging Cable

### Product Diagram:

#	Feature:	Description:
1.	Infrared Port	Used to operate the infrared remote control
2.	LEDs	6 x 1.5W red, green and blue (RGB) LEDs
3.	Mode/Power Switch (Rear)	Select between sound activated mode, automatic mode and power off
4.	Adjustable Knob	Allows you to adjust the angle of the light
5.	Mounting Bracket	Use as a base stand or attach to a light stand or wall mount
6.	5DC Power Socket (Rear)	Connect to the DC to USB charging cable and suitable USB power source

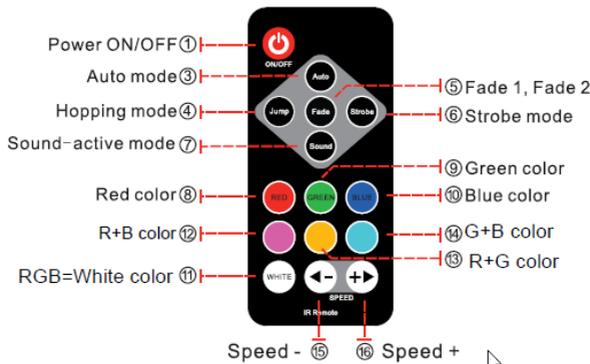

### Operation:

1. It is suggested to charge the product before use; connect the DC plug of the USB cable in to the rear DC power socket of the LED PAR Light.
2. Connect the opposite end of the USB cable to a suitable 5VDC USB mains power adaptor or a USB port of a computer or power bank to start charging the product.
3. You can use the internal rechargeable battery or connect the light to USB for it to be powered permanently.

4. Press the rear mode/power switch to either automatic which will start Automatic mode or sound which is sound activation and will flash to the sound of the music you're playing.

5. You can also operate the LED PAR light by using the included infrared remote control to change the colours, modes or speed.

### Remote Control:

### Safety:

1. Do not open the case of the party light to avoid damage and injury.
2. Keep the party light away from high temperatures as it may cause damage to the unit.
3. Do not expose the party light to water or liquids to prevent the unit from damage.
4. **WARNING - KEEP BATTERIES OUT OF REACH OF CHILDREN**, as the remote control contains Lithium button cell batteries which may be harmful.
5. Swallowing may lead to serious injury in as little as 2 hours or death, due to chemical burns and potential perforation of the oesophagus.
6. If you suspect your child has swallowed or inserted a button battery, immediately call the 24-hour Poisons Information Centre on 13 11 26 (Australia) or 0800 764-766 (New Zealand) for fast, expert advice.
7. Examine devices and make sure the battery compartment is correctly secured, e.g. that the mechanical fastener is tightened. Do not use if compartment is not secure.
8. Dispose of used button batteries immediately and safely. Flat batteries can still be dangerous.

### Specifications:

LED: 6 x 1.5W (RGB)  
 Run Time: 3-6 Hours  
 Charge Time: 3-4 Hours  
 Battery: 3.7V Li-ion, 2200mAh  
 Power: 5VDC, 500mA  
 Dimensions: 160(H) x 150(W) x 70(D)mm

#### **WARNING! KEEP BUTTON BATTERIES OUT OF REACH OF CHILDREN**

- If swallowed a lithium button battery may lead to serious or fatal injury in as little as 2 hours, due to chemical burns and potential perforation of the oesophagus.
- Non-lithium button batteries battery can cause serious injuries if it is swallowed or placed inside any part of the body.
- All button batteries must be kept away from children regardless if they are new or used.
- If you suspect your child has swallowed or inserted a button battery immediately call the 24-hour Poisons Information Centre on 13 11 26 (Australia) or 0800 764 766 (New Zealand) for fast, expert advice.
- If your child is having difficulty breathing contact 000 (Australia) or 111 (New Zealand).
- Dispose of used button batteries immediately and safely out of the reach of children. A battery can still be dangerous even when it can no longer operate the device.
- As soon as you have finished using a button battery, put sticky tape around both sides of it. This will make it harder for children to swallow the button battery and avoid the risk of the battery catching fire.
- Immediately dispose of button batteries immediately out of reach of children, or recycle using a child resistant container and take used cells to your local battery collection centre.
