#### PRODUCT DESCRIPTION

- |                  |               |
|------------------|---------------|
| 1. ON/OFF Button | 4. Blade      |
| 2. Battery Cover | 5. Metal Gear |
| 3. Lid Remover   | 6. Magnet     |

#### HOW TO INSTALL THE BATTERIES

- Hold the main body of the opener firmly with one hand, and place the finger of the other hand on the buckle of battery cover. Gently lift upwards with force to remove the battery cover.

- Insert 4 pieces of AA alkaline batteries according to the positive and negative terminals. Close the battery cover.

#### HOW TO USE THE CAN OPENER

Place the can opener on top of the can, making sure that the can edge is between the blade and the metal gear.

Press the button and let it rotate around the can on its own. After one rotation around the can, press the button again to stop. The can opener will automatically detach from the edge of the can.

Lift the lid and remove the can opener. If the magnet fails to lift the lid, you can try to pry it open with the lid remover.

#### CAUTIONS

- The blade of the can opener is sharp. Do not touch it with your fingers.
- After one rotation, press the button to stop immediately to prevent excessive cutting that may cause metal to shred.
- Please store this product out of reach of children.

#### TROUBLESHOOTING

If the opener does not work or stops during canning:

- Please check that the batteries are alkaline batteries.
- Please check that the batteries are installed correctly.
- Please confirm there is sufficient battery power.

- Please make sure that it is in the right position. Check the can for any dents or bendson the edges. If there are no problems with the can, restart the can opener.

If the lid remover can't pry the lid, it may be some canned food adheres to the lid due to moisture. You can manually lift the lid up to open.

If the above operations are all correct and the opener still works abnormally, please contact the vendor for maintenance service.
