High Temperature PLA/ABS 3D Pen Kit

HOBBYIST

User Manual

TL4582

FUNCTIONS:

OPERATING INSTRUCTIONS:

1. Plug in the AC adapter or to a power bank which has an output of 2A or above.

2. Click the filament loading button once to start heating. When the actual temperature reaches the preset temperature, the pen is ready to work.

3. Put the filament in through the filament loading hole. Keep pressing or double click the filament loading button to load the filament.

4. The buttons marked as "+" and "-" are used for temperature adjustment. The scope is 130°C to 230°C. The slide button is used for speed adjustment. Up is faster and down is slower.

5. Keep pressing or double clicking the filament unload button to unload the filament. Clicking the "+" and filament unloading button at the same time enables you to switch the temperature to fit either ABS or PLA.

6. The pen will enter standby mode after 2 minutes of no operation. Click the filament loading button to start heating the pen. Please do not touch the tip of the pen.

WARNING:

- This pen is suitable for children over 8 years old and adults. Children are only allowed to use the pen under adult supervision.
- The nozzle operates at high temperature, do not touch it while in operation.
- It is strictly prohibited to use any other material into the filament loading hole.
- Do not use power adapters other than the one provided in the kit.
- Prohibited to use filament provided by other company, with different filament parameters.
- Keep the pen away from water.
- Keep the pen in a safe place, out of reach of children.

PACKAGE CONTENTS:

- AC/DC Adapter
- Filaments
- User Manual
- 3D Pen
- Plastic Screw Driver
(for adjusting temperature and opening the back cover)
