(Master & Slave)

By default, the speaker is connected as one which can be controlled by the main volume buttons on the front of the speaker. If you take off the silicon rubber cover, twist and rotate the speakers to separate them into twir speakers providing you true left and right stereo audio.

Press and hold the power button simultaneously on both speakers for up to two seconds. It will connect automatically to one another once the Bluetooth is successful.

You can also just turn on one speaker if you prefer and control it using the power and volume buttons.

FAQS

What USB charger should i use for the speaker?
Any 5VDC, 1A USB mains power adaptor can be used or a standard USB 500mA computer port.

Why is there background noise when playing music?
The speaker has a Bluetooth® Range of up to 10m, reduce the distance to improve the sound coming from the speaker.

Why does the speaker shut down when it is working?
A: When there is no Bluetooth® device paired or Aux In cable connected to the speaker then it will automatically shut down after 10 minutes to save battery.

Why won't the speaker connect to a phone that has been previously paired?
Remove the speaker's pairing name "Digitech XC5242" from the Bluetooth® device list of your smartphone. Then press the Bluetooth® disconnection button to restart the pairing mode.

Why will the speaker not turn on?
Please leave the speaker plugged in to a charger and try to turn after a few minutes. The battery may be flat.
