

12 Volt Camping Shower

User Manual

YS2800

This portable shower will come in handy when you are traveling and outdoors. All you need is Water (rivers, dams, lakes, buckets) and a power source (12 Volt). For an added touch of luxury you can use warm water in your bucket. Great for indoor and outdoor use like hiking, camping, BBQ, flowering plants, pet showers and more!

Features

Extra long power supply cord (5m)

Hands Free Mounting Options

Bonus S-hook and suction cup

12V car cigarette connection

Submersible quiet water pump

Adjustable water pressure

2m Water Hose

Carry Bag

Directions

1. Plug the 12V connection into the power supply & drop the pump into a substantial water source.
2. Turn the power switch ON, within moments water will begin to flow through the showerhead connection.
3. Adjust the water strength by sliding the button left or right on the shower head.

DO NOT take the pump out of the water while in use. The shower will not be able to automatically start after putting the pump back into the water.

If there is no water flowing after the pump is dropped into water. Turn the shower off and hold the tube vertically to allow all water to drain out. Drop the pump back into water and turn power switch ON to restart.

Draw water from rivers, dams, lakes, buckets, stockpots & more!
